PROLOGUE

Markus Raabe is a German entrepreneur. As a state-certified and officially licensed farrier, he founded in 2003 a specialist company for hoof diseases in Germany. As an expert witness for farriery, his expertise was and is in demand worldwide. He is authorised to train for the profession of farriery. All his students are successful worldwide today.

As an accredited journalist, Raabe advocates for positive dialogue in Europe. Especially the difficult economic situation in Eastern Europe is a fundamental focus of his reporting.

As an expert for sport horses, he provides the hoof-technical treatment for international Olympic riders. He works for the USA, Australia and of course for European national teams.

In his home country, Münsterland, he runs a specialist business for hoof diseases. He has specialised in the treatment of hoof cancer, navicular syndrome, podotrochlose and laminitis.

With his team of selected experts he offers seminars and courses for farriers and veterinarians worldwide.

Markus Raabe founded the equine aid organisation EQUIWENT. Equiwent helps maltreated working horses in Europe. In Romania, in Suceava, he built a small horse clinic which offers free help for injured horses.

1 DAY

GROUP SIZE AND COURSE LOCATIONS

The groups should not be larger than 10 people so that individual lessons can take place.

The seminars can be offered in Germany or Romania at Markus Raabe.

Alternatively, we can also organise the seminars on the premises of the veterinary universities in the respective countries.
